

## Prescription Treatment® brand Duraplex® TR Micro Total Release Insecticide ...

Is a ready-to-use, ultra low volume insecticide fogger that controls a wide variety of greenhouse insects.

### Labeled for use in ...

Greenhouses on Bedding Plants, Cut Flowers, Flowering Hanging Baskets, Foliage, Potted Flowering Plants and Ornamentals.

### Duraplex TR controls ...

Aphids, Fungus Gnats, Mealybugs, Mites, Scale, Shore Flies, Thrips and Whiteflies. See label for additional insects controlled.

### The active ingredients ...

Are a combination of chlorpyrifos and cyfluthrin. Chlorpyrifos is a broad spectrum organophosphate insecticide. Cyfluthrin is a third generation synthetic pyrethroid.

### Micro Total Release Insecticides ...

Are a unique ULV pesticide application system that efficiently delivers billions of 10-20 micron-sized particles of pure active ingredient per unit in a matter of minutes. The 2 oz. micro foggers treat 3,000 square feet of greenhouse space and the 6 oz. canisters treat 9,000 square feet (requiring only five canisters to treat one acre of greenhouse). These micro total release insecticides insure uniform coverage with multiple delivery points throughout the greenhouse, with approximately 40% of leaf deposition occurring on the bottom leaf surface.

### Duraplex TR provides ...

- The effectiveness and convenience of a total release insecticide.
- A 24-hour REI (reentry interval) and a quick start to the REI clock ... just 10 minutes after application.
- The synergy of an organophosphate + a pyrethroid pre-mixed in one can.
- A totally dry application of active ingredient—no water or other liquid inerts.
- Safety on a wide variety of plants, including open blooms.
- A propellant system that covers 3,000 square feet from a 2 oz. fogger.
- A 6 oz. canister that covers 9,000 square feet (only 5 cans required per acre).

### Operational Benefits

Use Duraplex Micro Total Release Insecticide for quick, easy application, thorough coverage, excellent plant safety, and low worker exposure. Micro foggers reduce operating expenses; there is no expensive fogging equipment to maintain or repair and no chemical mixing or clean up. To further reduce costs, use the 6 oz. 9,000 square foot aerosol foggers which require only 5 canisters per acre. The totally dry pesticide application system of Duraplex provides enhanced plant safety, even on most open blooms.

### Product Specifications:

- Active Ingredients: chlorpyrifos and cyfluthrin
- Insecticide Classes: organophosphate (chlorpyrifos); pyrethroid (cyfluthrin)
- Signal Word: WARNING
- Reentry Interval: 24 hours
- Restricted Use Pesticide: For retail sale to and use by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification.
- Size: 3,000 sq. ft. canister (2 oz.)  
9,000 sq. ft. canister (6 oz.)
- Packed: 12 canisters per case
- Application Rates: 2 oz. treats 1,500-3,000 sq. ft.;  
6 oz. treats 4,500-9,000 sq. ft.
