

Prescription Treatment® brand Preclude® TR Micro Total Release Insecticide ...

Is a ready-to-use, ultra low volume insecticide fogger that controls a wide variety of greenhouse insects.

Labeled for use in ...

Greenhouses on Bedding Plants, Cut Flowers, Flowering Hanging Baskets, Foliage, Potted Flowering Plants and Ornamentals.

Preclude® TR controls ...

Thrips, Whiteflies, Scale and Aphids. See label for additional insects controlled.

The active ingredient, fenoxycarb ...

Is an insect growth regulator (IGR) that disrupts the insect's life cycle at immature stages.

Micro Total Release Insecticides ...

Are a unique ULV pesticide application system that efficiently delivers billions of 10-20 micron-sized particles of pure active ingredient per unit in a matter of minutes. The 2 oz. micro foggers treat 3,000 square feet of greenhouse space and the 6 oz. canisters treat 9,000 square feet (requiring only five canisters to treat one acre of greenhouse). These micro total release insecticides insure uniform coverage with multiple delivery points throughout the greenhouse, with approximately 40% of leaf deposition occurring on the bottom leaf surface.

Preclude® TR provides ...

- The effectiveness and convenience of a total release insecticide.
- A 12-hour REI (reentry interval) and a quick start to the REI clock ... just 10 minutes after application.
- IGR control of immature stages of insect pests —not adults.
- A long lasting, photostable active ingredient.
- A totally dry application of active ingredient—no water or other liquid inert.
- Safety on a wide variety of plants, including open blooms.
- A propellant system that covers 3,000 square feet from a 2 oz. fogger.
- A 6 oz. canister that covers 9,000 square feet (only 5 cans required per acre).

Operational Benefits

Use Preclude Micro Total Release Insecticide for quick, easy application, thorough coverage, excellent plant safety, low worker exposure and short reentry times. Micro foggers reduce operating expenses; there is no expensive fogging equipment to maintain or repair and no chemical mixing or clean up. To further reduce costs, use the 6 oz. 9,000 square foot aerosol foggers which require only 5 canisters per acre. Use Preclude regularly as the cornerstone of control for thrips and whiteflies. For enhanced control, use in rotation with an adulticide. Preclude may be space mixed with Attain® or Duraplex®. Preclude's dry pesticide application system provides enhanced plant safety, even on most open blooms.

Product Specifications:

- Active Ingredient: fenoxycarb
- Insecticide Class: insect growth regulator
- Signal Word: CAUTION
- Reentry Interval: 12 hours
- Size: 3,000 sq. ft. canister (2 oz.)
9,000 sq. ft. canister (6 oz.)
- Packed: 12 canisters per case
- Application Rates: 2 oz. treats 1,500-3,000 sq. ft.; 6 oz. treats 4,500-9,000 sq. ft.
