

# Field Conditioner

## *Calcined Clay Soil Modifier*

**PrimerOne Soil Conditioners** provide solutions to maintenance problems on baseball infields and athletic turf fields. PrimerOne Calcined clay products are manufactured specifically to condition fields to improve drainage, reduce compaction and manage moisture.

**PrimerOne Field Conditioner** has the unique ability to absorb its own weight in water and slowly release this moisture over and over again. PrimerOne conditioned fields result in less rainouts, less missed practices, and less field damage. PrimerOne Field Conditioner is manufactured to work season after season.

### **Infields**

Maintaining a quality infield is the most important responsibility of a groundskeeper. Incorporating PrimerOne Field Conditioner into the skinned infield will prevent rainouts in the spring and hard compacted infields in the dry summer.

### **Turf Applications**

PrimerOne Field Conditioner incorporated into your turf will add valuable pore space in the soil, preventing compaction that will destroy turf. PrimerOne Field Conditioner will increase drainage and manage moisture, allowing turf to thrive.

#### **Ingredient**

*100% Calcined Fullers Earth  
(also known as Calcined Clay)*

#### **Packaging**

*50 lb bags  
(40 bags/pallet)*

#### **Bulk Density**

*35. lbs. / cubic ft.  
19 bags (50 lb) = 1 cubic yard*

#### **Application Instructions**

*Complete use directions  
are listed on the back  
of the bag*
